Funding Opportunity Announcement (FOA) Information

**Research Core:** The Informatics, Integration, and Innovation Core (I^3)

**Application Due Date:** Tuesday, March 31, 2020

**Description**

The I3 Core (pronounced “ice cubed”) will micro-fund faculty-initiated projects that utilize the newly developed ACCM-Precision Medicine Analytics Platform (ACCM-PMAP). The ACCM-PMAP is designed to provide nearly self-service accessibility to data. However, The I3 Core recognizes that most faculty will require additional informatics and data science resources to develop and complete a data science project. The ACCM-PMAP will support simple abstraction of data from the ACCM-PMAP projection and oversee more complex data abstraction by investigators. The I3 Core anticipates that some investigators will need additional assistance in data abstraction and analysis. This service will be offered by ACCM-PMAP staff (in collaboration with the Core for Clinical Research Data Acquisition (CCDA)) at a discounted fee. Some work may require the extraction of more data elements from the larger JHM PMAP to create a study-specific projection. In this case the investigators will need to request service from the CCDA. The current service rates from the CCDA are between $84 and $114/h.

Each award will be able to fund between 25 and 75 hours of development or analysis work. Preference will be given to projects that can be accomplished using the ACCM-PMAP resources, but projects that use CCDA resources to further develop ACCM-PMAP will also be highly regarded. Candidate projects with budgets between $2000 and $5000 will be considered.

**Eligibility**

Investigators are required to be a member of the Department of Anesthesiology and Critical Care Medicine.

**Award Information**

**Funding Mechanism:** Grant

**Anticipated Total Available Funding:** $15,000

**Anticipated Number of Awards:** 3-5

**Anticipated Award Amount:** $2,000 - $5,000

**Length of Project:** 6 months

**Cost Sharing/Match Required?:** No
Proposed budgets cannot exceed $5,000 in total costs. Funding estimates for this announcement are based on an annualized Continuing Resolution and do not reflect the final FY 2021 appropriation. Applicants should be aware that funding amounts are subject to the availability of funds.

**Contact Information**

Adam Sapirstein

**Application Materials**

**Project Title:**

**Faculty Member:**
- Name
- ACCM Division
- Job and Rank
- Email
- Cell phone

**Amount of Funding Requested:**

*Be sure to include the project budget as an attachment to your application

**Other Funding Source (if applicable):**

**Project Description (approximately 500 words)**
