

Funding Opportunity Announcement (FOA) Information

Research Core: Quality and Safety Research Core (QRC)

Application Due Date: Tuesday, March 31, 2020

Description

The Quality and Safety Research Core has allocated \$20,000 to its members to foster and encourage the development of research in quality and safety. We will offer this money to each and every member of the QRC in the form of micro grants, around \$2000 each. Micro grants can be used to facilitate the following:

- access to clinical data housed in CRC
- access to statistical help for pilot projects
- support for graduate students to perform human factors observational work
- software that will facilitate your research
- purchase of equipment needed to do your work

Micro grants will not be limited to the above. Be creative. What will make you successful? What tools will allow your research to get off the ground?

To apply, simply provide a brief document outlining how much you need and for what purpose. Decisions will be made by the QRC leadership (Abernathy, Hensley). Micro grants will be awarded on a rolling, ongoing basis.

Eligibility

Investigators are required to be a member of the Department of Anesthesiology and Critical Care Medicine.

Award Information

Funding Mechanism: Grant

Anticipated Total Available Funding: \$20,000

Anticipated Number of Awards: 5-10

Anticipated Award Amount: up to \$5,000

Length of Project: 6 months

Cost Sharing/Match Required?: No

Proposed budgets cannot exceed \$5,000 in total costs. Funding estimates for this announcement are based on an annualized Continuing Resolution and do not reflect the final FY 2021 appropriation. Applicants should be aware that funding amounts are subject to the availability of funds.
